

APPENDIX C

PHASE DEFINITIONS

1. **Software Requirements Analysis (SRA):** This activity includes surveillance tasks, from System Requirements Review (SRR) activities up to and including establishment of the allocated baseline and completion of the Software Specification (SSR).
 2. **Preliminary Design (PD):** This activity spans surveillance tasks from SSR up to and including initiation of the developmental configuration and completion of the Preliminary Design Review (PDR).
 3. **Detailed Design (DD):** This activity spans surveillance tasks from PDR up to and including completion of the Critical Design Review (CDR).
 4. **Coding and Unit Testing (C&UT):** This activity spans surveillance tasks from CDR to initiation of CSC integration and testing.
 5. **Software Acceptance (SW_ACC):** This activity spans surveillance tasks from CSC integration testing up to and including DD250 acceptance. OT&E Tasks are treated as an add-on via customer over ride, since this rarely happens within our cognizance.
 6. **System Acceptance (SYS_ACC):** This activity spans surveillance tasks for OT&E. These tasks are treated as add-ons via customer over ride, since this rarely happens within our cognizance.
